

Resume

MICHAEL E WEATHERLY PE **Senior Civil & Environmental Engineer**

Education

BS, Civil Engineering, 1979, Clemson University
Post Graduate Studies, 1985, University of
Kentucky

Experience Highlights

Professional engineer providing full engineering services for the design-bid-build project delivery method from concept to construction for civil and environmental projects, particularly public works water and wastewater projects and civil site development for residential, commercial, municipal, institutional, and industrial clients. Capabilities include planning, funding assistance, design, preparation of construction plans and specifications, permitting, construction and contract administration, inspection, testing, analysis and system start-ups, client relations, and total professional responsibility.

Professional Experience

Principal Civil & Environmental Engineer, "Michael E. Weatherly, P.E." Columbia, SC (1991 - Present)
Principal owner and engineer, currently engaged in the private practice of civil and environmental engineering, primarily residential and commercial site development and municipal water and wastewater facilities for residential, municipal, industrial, institutional, governmental & commercial clients.

Civil Engineer, "Stevens & Wilkinson, Architects & Engineers, Inc" Columbia, SC (1999-2000)
Contract civil engineering engagement with prestigious A/E firm, responsible for preparation of site development plans for various commercial projects.

Civil and Environmental Project Engineer, "Site Consultants, Inc" Columbia, SC (1989-1991)
Project and design engineer responsible for the design and management of the firm's water and sewer

projects as well as other environmental projects and issues. Responsible professional engineer of record and in charge of major municipal capital improvement projects as large as four million dollars in constructed costs.

Environmental Engineer I, II, III, "South Carolina Department of Health & Environmental Control" (DHEC) (1981-1988)

Staff project engineer in the departments of wastewater and water supply construction permitting sections. Responsible for the review, design, construction inspection and permitting of domestic wastewater and water supply facilities proposed by the consulting engineering community. Generally charged with the task of implementing the Clean Water Act at the state level. Extensive contact and coordination with the consulting engineering community, owners both municipal and private as well as other State and Federal regulatory agencies.

Civil Engineer, "US Army Corps Of Engineers" Savannah, Georgia (1980-1981)

Civil engineer in the Corps design and management branches. Work involved rotations in the Corps structural design, soils engineering, project management, construction management, cost engineering and coastal engineering branches.

Experience with State of South Carolina

Mr. Weatherly has participated in several civil engineering projects for agencies in South Carolina, including PRT and the Department of Corrections, while on the professional staff of Site Consultants Inc. He is familiar with state procurement requirements for preparation of plans, specifications, and construction administration of civil works projects.
